Week 5

R markdown is a file format for making dynamic documents in R.

They are great for sharing knowledge.

Markdown:
is a syntax for formatting plain text files.

HTML:
is a set of markup symbols or codes used to create webpages.

Automatically format things
(Metegata)

YAML:

A language for data that
translates it to it's readable

(There were the same concepts
as I have cloreully learnt - not
writing them here)
